**Subject:** Nuclear restructuring plans to the European Commission for a state aid decision

Dear Minister Hendricks,

I'm councilor of the Greens in Wunsiedel and as such, I'm German member of Nuclear Transparency Watch. Please excuse me - with respect to my colleagues - writing in English. I participate in the public workshops of the Endlager Kommission. And I was the one asking Hungary in the Munich EIA PAKS II hearing whether it would be OK to use public money for PAKS II without a tender. This was followed by an investigation of the European Commission.

Now I would like to ask you urgently: Would you please submit the restructuring plans to the European Commission for a state aid decision? I think, that E.ON, RWE etc should be funding the rad-waste from their profits.

And would you be so kind to tell me when the Bundestag rad-waste commission report will be officially released? Thank you very much for your efforts.

Attached below some newspaper articles.

Yours sincerely,

Brigitte Artmann
